Services

Safety First, Last & Always

Newville Construction Services is the leader in providing safe, efficient, environmentally compliant services for drilling, blasting transmission line and substation construction, foundations, restoration and maintenance.

Newville Construction Services is dedicated to providing safe, quality, environmentally yielding and innovative construction, engineering and project management to our customers. Founded on family values and decades of experience, we strive to implement outstanding relationships with our clients based on safety, quality, efficiency, integrity and an anticipation of their needs. With our expanding services and teams, we continually provide safety, regulatory, quality and innovative training priding ourselves in offering our clients with premier service.

Safety is Our Core Value

Newville Construction Services is uncompromising in our commitment to providing a safe work environment and a team that adheres to all safety compliances and regulations.

NCS incorporates proactive safety and risk management systems to eliminate hazards on all our work-sites. To achieve this, we create an environment that places the highest value on the health and safety of the employees, customers and community.

Joining Our Team

As our work force continues to grow, Newville Construction Services takes initiative to ensure safety is communicated to all team members. We provide orientation programs and training that cover Newville Construction Services Expectations for safe work practices as well as review all company safety policies and procedures. Our implementation of human performance and behavior-based safety culture equips our team members for success when they head into the field.

Project Safety Planning

Successful projects begin with a formulated safety and regulatory plan. We have experienced and knowledgeable project managers and safety professionals executing and overseeing all projects, conducting job briefings prior to the start of each workday and when any conditions change. Each member of the crew, any visitors and/or sub-contractors are briefed on our safety and regulatory plan and must sign-in on the job brief.
